

# Cleaning instruction

Dear Customers:

The electroplating on this product is finished to a high standard. To keep the product surface in pristine condition, clean with a soft damp cloth only. To avoid limescale / watermarks from building up, it is advisable to wipe the fitting dry each time it is used.

Damage to the surface caused by improper cleaning/maintenance will not be covered under guarantee.

On no account should any bathroom cleaner be used on this product as these can contain acids that are aggressive/corrosive on finished surfaces!
